

We have developed and maintained quite a few website/intranet based on Joomla/Mambo CMS platform. We have extensive hands on expertise on this CMS platform (Joomla is our preferred CMS), which includes custom template design, custom component/module development, intranet/groupware/project management integration, ERP/CRM/Vertical Market Application integration, custom communication component/VOIP( such as web based conference suite and Asterisk VOIP) and Business Process Flow Management into Joomla/Mambo framework. Beside Joomla, we also have expertise in LAMP (Linux, Apache, MySQL, and PHP), AJAX, Lotus-Domino, PERL and .NET based application development. Below we are listing some of the works we have done using Joomla/Mambo platform.

<a href="http://www.homeconnex.ca">www.homeconnex.ca</a>	
<ul style="list-style-type: none"> <li>• Joomla based Real Estate site.</li> <li>• Property listing engine integration with Joomla.</li> <li>• Open Realty bridge</li> <li>• MLS export.</li> <li>• 360° Virtual Property Tour</li> <li>• Google Mapping.</li> <li>• CRM integration (CivicCRM).</li> <li>• Custom designed component for Roger-Cantel Paging service for Joomla.</li> <li>• Skype Module.</li> <li>• Document exchange via SSL.</li> <li>• Scheduling system/Ical</li> <li>• Custom Forms</li> <li>• Viral Tools</li> <li>• Advanced financial calculator.</li> <li>• Intranet</li> </ul>
